

Madeline Chadehumbe, M.D. is a pediatric neurologist at Children's Hospital of Philadelphia. She is one of the two neurologists specialized in caring for patients with 22q11.2 deletion syndrome. She has interest and experience in treating the cognitive, behavioral and movement disorders of children with this syndrome. She is interested in understanding the behavioral and neurological links in these children. She also sees children with migraines, Tourette's, epilepsy and learning disorders. She received her neurology training at Cincinnati Children's Hospital.
